

EcoBOSS™ IS YOUR CUSTOM PANEL SHOP FOR ALL OF INDUSTRIAL VENTILATION

NEEDS! Through decades of industry experience, Boss Products Engineers have gained valuable experience in most applications and can design and manufacture custom control panels for virtually any application. All control panels are built in our fully equipped UL508A panel shop that includes highly skilled technical staff to take your idea from concept to fruition. Whether it be a single one off motor starter panel for a vehicle exhaust application or a highly advanced plant wide system controlling multiple dust collectors, Boss Products will always provide a high level of detail to your project with exceptional service at a competitive price.

Example Panel Applications

- OEM panels
- Panels for Public Works and schools (built to design engineer's specifications)
- Panels for hazardous locations
- Simple motor starter panels
- Filter monitoring systems
- Prototype or high volume production
- Customization of standard EcoBOSS™ Control Systems
- Custom remote start/stop stations
- Panel rebuilds and modifications
- And many more

Example Options

- All NEMA enclosure ratings
- Private labeling
- Custom labeling/engraving
- HMI (Human Machine Interface) integration and programming
- Integration of specified brand components
- Filter cleaning controls
- Complete engineering services
- Start up/commissioning services

Example Applications:

- Dust Collection
- Mist Collection
- Fume/Smoke Collection
- Ambient Air Cleaning
- Vehicle Exhaust
