

ACTION BOOTH

by A.C.T. DUST COLLECTORS

Industry demands fast, efficient and effective dust collection solutions. A.C.T. Dust Collectors introduces the ACTION Booth, one of the most versatile systems for industrial air filtration. The unique design combines heavy duty construction with multi-function design that is customizable to meet your work space needs and CFM requirements. Simply position the ACTION Booth at the back of your work area, assemble the walls and roof, and set up your work area. Our booth walls have no internal flanges for a smooth finish. This smooth finish promotes good airflow through the booth and minimizes the chance for dust to settle out of the airstream. Our optional return air system provides an extra push where heavier particulate is being generated. The return air system comes with a bleed-off damper for better control of your airflow through the booth. The dirty air is drawn into the oversized inlet, which has vertical, spark arresting louvers to evenly distribute incoming, dirty air while providing velocity reduction for heavy material separation and longer filter life. The ACTION Booth Power Module features an integral blower/motor that is surrounded with noise attenuation material for quiet operation. Clean air is returned to out the top of the ACTION Booth and recirculated back to your factory. High efficiency vertical cartridge filters capture the dust, while an automatic pulse clean system helps extend the filter life for sustained airflow and lower maintenance costs.

Model: ACTION Booth

Standard Features:

Multi-module systems any CFM requirement
Modular construction

16 gauge powder coated panels

Heavy duty 10 and 7 gauge framing

Highly customizable size options

No internal flanges

Return Air System

A.C.T. Nano-Elite Nanofiber Cartridges

100% Front & Top Access Collector

Pulse Filter Cleaning System

Control Box w/Digital Timer

Fan Silencer Plenum

Fully Enclosed, Removable Plenum Lined with Sound Attenuation Material

4-cartridge Back/Cross flow dust collection

Dust Drawers

Easy Access Dust Removal

HEIGHT	WIDTH	DEPTH	# OF FILTERS	FILTER AREA
8' - 12'	8' - 40'	8' - 24'	4 per module	1,400 per module

*Ranges are not limited; Highly customizable size options available
